Research interests

Min forskning drejer sig om neurorehabilitering, langvarige konsekvenser af hjerneskade og kognitive forstyrrelser med et særligt fokus på fatigue (træthed) som følgevirkning ved kronisk sygdom. Min forskning beskæftiger sig blandt andet med:

Udredning, måling og kvantificering af psykiske egenskaber i relation til neurorehabilitering

At identificere, definere og beskrive de "aktive ingredienser" i rehabiliteringsindsatser

Evaluering af effekt i komplekse, sammensatte, tværfaglige og individuelt målrettede behandlingstiltag

Research stays at foreign research institutions

2021 Oct-Nov	Sunnaas Rehabilitation Hospital, Norway
